

FRASER FORBES REAL ESTATE SERVICES welcomes a huge power player, Stephen Z. Kaufman, to our prestigious team!

Potomac, Maryland—May 4, 2017—Fraser Forbes Real Estate Services is delighted to welcome Stephen Z. Kaufman to our team.

Stephen has joined Fraser Forbes as an Executive Vice President for our consulting division. He will be providing strategic advice to our clients for their real estate needs. This will specifically include supporting the development industry, health care, government, education, corporate, associations and non-profits.

Stephen has been involved in land use and strategic planning dealing with complex real estate needs throughout his career. He takes a visionary approach to development, preparing clients for long term solutions while working to mitigate any problems that prevent them from achieving their goals. He has built a reputation as a problem-solver who works to find solutions that benefit his clients, the community and local government. As one of the top land use, zoning and legislative attorneys in Montgomery County and the greater Washington metropolitan area, Stephen continues to provide legal services for Linowes and Blocher.

Fraser Forbes Real Estate Services-About Us

Founded in 1995, Fraser Forbes Real Estate Services (www.fraserforbes.com) offers one of a kind Consulting and Brokerage Services that support Land and Property ground up development and redevelopment in the greater Washington, DC/Baltimore region. Our diverse and highly accomplished executive team has over 200 years of combined experience. We have supported over 650 projects, encompassing over 60,000 residential lots and over 8 million square feet of commercial land totaling in excess of \$5.5 billion in land and property transactions throughout Virginia, Maryland and DC. Whether representing clients in an advisory, management, acquisitions, dispositions, or financing capacity, our team and our comprehensive scope of services consistently deliver the very best results so that our clients may earn the highest possible returns on their time and investments.
